

OFFICIAL STATEMENT DEMANDING THE IMMEDIATE RESIGNATION, IMPEACHMENT, AND CRIMINAL PROSECUTION OF DONALD J. TRUMP, THE INDICTMENT OF ELON MUSK, AND ACCOUNTABILITY FOR ALL COMPLICIT OFFICIALS FOR EGREGIOUS CONSTITUTIONAL VIOLATIONS AND BETRAYAL OF PUBLIC TRUST

We, the vigilant citizens of the United States of America, resolute in our commitment to uphold the Constitution and the democratic principles it enshrines, hereby demand the immediate resignation, impeachment, and criminal prosecution of former President Donald J. Trump. We further call for the indictment and thorough investigation of Elon Musk for his actions within the Department of Government Efficiency (DOGE), and insist upon accountability for all elected officials, appointees, and supporters who have violated their constitutional oaths, thereby engaging in corruption and, in certain instances, treason.

1. Donald J. Trump – Unprecedented Assault on Constitutional Governance

Throughout his tenure, Donald Trump engaged in a relentless campaign of executive overreach, blatant constitutional violations, and actions that prioritized personal power over the foundational rule of law:

- **Violation of the 14th Amendment:** Trump's executive order attempting to dismantle birthright citizenship sought to strip citizens of their rights, defying the clear constitutional mandate that all individuals born on American soil are citizens.
- **Assault on the 10th Amendment:** His executive order targeting sanctuary cities unlawfully sought to coerce states and local governments into compliance with federal immigration policy, undermining state sovereignty.
- **Unlawful Impoundment of Funds:** Trump's unilateral action to delay or cancel appropriations enacted into law constitutes unlawful impoundment, violating the constitutional separation of powers.
- **Establishment of a Faith Office:** The creation of a White House Faith Office represents a direct assault on the First Amendment's Establishment Clause, mandating a clear separation between church and state. This initiative effectively endorses specific religious beliefs, marginalizing individuals of minority faiths and those who identify as non-religious, thereby undermining the inclusive, secular nature of our government.
- **Incitement of Insurrection:** Trump's actions leading up to and during the events of January 6th, 2021, including inciting a violent mob to storm the U.S. Capitol in an attempt to overturn a lawful election, represent a blatant violation of his oath of office and an unprecedented attack on our democratic institutions.

These actions are not merely instances of poor governance but constitute a calculated assault on the Constitution itself, striking at the heart of the separation of powers, individual rights, and the balance of state and federal authority.

We, the People, demand:

- The immediate initiation of impeachment proceedings against Donald J. Trump for constitutional violations and abuse of power.
 - A full criminal investigation and prosecution for violations of federal law, including civil rights abuses, obstruction of oversight, and corruption.
-

2. Elon Musk – Corporate Overreach and Subversion of Democratic Institutions

Elon Musk, under the guise of efficiency, has transformed DOGE into a vehicle for corporate dominance and personal enrichment, weaponizing the apparatus of government to serve private interests:

- **Unconstitutional Dismantling of Agencies:** Musk's closure and defunding of regulatory agencies, including the Consumer Financial Protection Bureau (CFPB), represent an unconstitutional seizure of legislative power. The authority to create and dissolve federal agencies resides with Congress, not a private billionaire embedded within the executive branch.
 - **Conflict of Interest and Insider Abuse:** While wielding government authority, Musk remains at the helm of Tesla, SpaceX, and X, creating a self-serving nexus of influence that has directly benefited his corporations through deregulation and preferential policies.
 - **Violation of the Separation of Powers:** Musk's unchecked authority within DOGE bypasses congressional oversight, replacing democratic governance with corporate autocracy—an affront to Article I of the Constitution.
 - **Invasion of Citizen Privacy:** Under Musk's leadership, DOGE has reportedly accessed private financial data without proper authorization, violating the Fourth Amendment and the right to privacy.
-

We, the People, demand:

- The immediate suspension of Elon Musk from all government roles pending a full investigation.
 - The initiation of federal criminal charges, including abuse of power, conflict of interest, and unauthorized surveillance.
 - Congressional hearings to review the legality of DOGE and its actions, ensuring future safeguards against corporate encroachment on democratic institutions.
-

3. Complicity of Congressional Members and Supporters

Numerous members of Congress and other public officials have not only failed to check the unconstitutional actions of the executive but have actively abetted them, thereby betraying their sworn duty to uphold the Constitution:

- **Violation of Oath of Office:** By supporting or failing to oppose unconstitutional actions, these individuals have breached their solemn oath to "support and defend the Constitution of the United States against all enemies, foreign and domestic."
 - **Acts of Treason:** In instances where officials have willfully undermined the constitutional order, their actions may constitute treason, as they have betrayed the foundational principles of our nation.
-

We, the People, demand:

- Comprehensive investigations into all individuals—elected or appointed—who have violated their constitutional oaths, with a focus on identifying acts of corruption and treason.
 - The prosecution of all individuals found to have committed crimes against the Constitution and the public trust, ensuring that justice is served without prejudice or favor.
-

4. Supreme Court Justices – Abdication of Judicial Responsibility and Erosion of Constitutional Checks and Balances

In a grievous dereliction of duty, certain Supreme Court Justices have forsaken their role as guardians of the Constitution, enabling an alarming expansion of executive power that verges on autocracy:

- **Granting Unprecedented Presidential Immunity:** In the case of *Trump v. United States*, the Court's majority ruled that a former president is entitled to absolute immunity from criminal prosecution for actions within his "conclusive and preclusive constitutional authority." This decision dangerously elevates the president above the law, contravening the foundational principle that no individual is above accountability.
 - **Erosion of Legislative Authority:** By endorsing the unilateral dismantling of federal agencies by the executive branch, the Court has undermined Congress's constitutional prerogative to create, organize, and dissolve executive offices and departments.
 - **Undermining Judicial Review:** Recent rulings that insulate presidential actions from judicial scrutiny erode the principle of judicial review, destabilizing the balance of power that sustains our republic.
-

We, the People, demand:

- Immediate accountability through thorough investigation and potential impeachment of any Justices found to have violated their oaths to uphold the Constitution.
 - Restoration of judicial integrity through the appointment of Justices committed to preserving the checks and balances integral to our democracy.
 - Legislative action to reaffirm the limitations of executive power and reinforce the accountability of all public officials, including members of the judiciary.
-

5. White Supremacist Ties Among Public Officials – Complicity in Promoting Hate and Division

The appointment of individuals with documented ties to white supremacist groups or extremist ideologies to influential positions within the administration and government is an affront to the values of equality, justice, and the rule of law that our nation was founded upon. These individuals, by their association and actions, perpetuate hatred and division, threatening the unity and progress of the American people.

- **Ties to White Supremacist Groups:** Several individuals within the Trump administration, including those appointed to advisory positions or the federal judiciary, have been revealed to have ties to far-right extremist groups such as the Proud Boys, Oath Keepers, or other white nationalist organizations. These appointments not only raise serious questions about the values of those in power but also endanger the lives of marginalized communities across the nation. The most prominent example being the appointment of Stephen Miller, a senior adviser known for his white nationalist views and advocacy for extreme anti-immigrant policies. His role in shaping immigration policy served to directly empower and embolden hate groups, undermining the values of inclusion and equality.
 - **Prosecution or Removal from Office:** The presence of individuals with extremist ties in public office undermines the very essence of our democracy. Those who promote hate, division, and inequality must be removed from office immediately. They should face legal consequences for any actions that have perpetuated violence, discrimination, or infringed upon the civil rights of American citizens.
-

We, the People, demand:

- A comprehensive investigation into all individuals appointed to public office who have known ties to extremist organizations, including those within the judicial system, executive positions, and advisory roles.
- The immediate removal and prosecution of those found to have committed any illegal actions while in office, with particular attention paid to anyone connected to or supporting white supremacist groups.

- The passage of strict laws and regulations prohibiting individuals with known extremist ideologies from holding public office or being involved in governmental decision-making.
-

6. Project 2025 – A Dangerous Agenda to Subvert Democracy

Project 2025, a strategic plan developed by conservative groups to reshape the federal government, reflects a troubling agenda that threatens the very foundation of our democracy. Spearheaded by figures with questionable motives, Project 2025 seeks to systematically dismantle regulatory agencies, eliminate oversight, and consolidate power in the hands of a few, all while pushing forward an extreme political ideology that disregards the will of the people.

- **The Author and His Agenda:** Project 2025 was authored by conservative figures seeking to solidify their political dominance by embedding loyalists in key positions across the federal government. Leading the charge is conservative activist and attorney Leonard Leo, whose work with the Federalist Society and ties to right-wing judicial appointments raises concerns about his motivations. Leo's agenda to reshape government through Project 2025 places partisan loyalty over public service, and his push to subvert existing government structures in favor of extreme right-wing ideologies is an affront to the democratic principles enshrined in the Constitution.
 - **Illegal Implementation and Breaches of the Constitution:** The plan to replace nonpartisan civil servants with loyalists who will serve political interests and bypass Congressional oversight represents an unprecedented assault on democratic institutions. These tactics threaten the fundamental checks and balances system that ensures no branch of government can overreach. The efforts to dismantle the administrative state and erode civil service protections have sparked grave concerns about the erosion of federal agencies' independence and their ability to protect citizens. Through Project 2025, we see a clear attempt to usurp democratic processes and impose undemocratic ideologies on the American public.
-

We, the People, demand:

- An immediate investigation into the development, funding, and implementation of Project 2025, with a focus on identifying any illegal actions taken to infiltrate or control federal agencies through political appointments.
- The prosecution of those responsible for attempting to illegally consolidate power, including Leonard Leo and others who have worked to subvert democratic institutions through Project 2025.
- The passage of laws that prevent future attempts to manipulate government structures for partisan gain, ensuring that all appointments and decisions made within federal agencies are based on merit and adherence to the Constitution, rather than political loyalty or ideological extremism.

A Final Call for Accountability – The People Must Prevail

This moment represents a profound turning point for the United States of America. As the very foundation of our democracy is challenged by those who seek to erode the rule of law and impose authoritarian control, the People must rise to defend what is sacred: our rights, our institutions, and the Constitution itself.

The crimes and acts of corruption detailed above are not isolated incidents—they represent a systematic effort to dismantle the very structure of our government. We cannot allow white supremacist ideology, unchecked power grabs, and the erosion of our democratic institutions to continue unchecked. The presence of extremists in power, the weaponization of government for personal gain, and the subversion of the Constitution must be met with unrelenting resistance.

We, the People, demand:

- **Immediate action to hold accountable all those who have undermined the Constitution and the principles of democracy.**
- **The resignation, impeachment, and criminal prosecution of those in positions of power who have betrayed the American people.**
- **The restoration of government for the People, by the People, and for the People—ensuring that our democracy is not subverted by individuals who seek to turn it into a tool for personal and political enrichment.**

Our Constitution demands nothing less. It is time for us to stand united, demanding justice and accountability for the preservation of our democracy, our rights, and our future.

Signed,

The Citizens of the United States of America
